#LookCloser

SATRON VT pressure transmitter belongs to the series V-transmitters. SATRON VT is used for 0–1.4 kPa...0–100 MPa ranges. It is a 2-wire transmitter with HART® standard communication. In pressure measuring applications SATRON VT-transmitters are used for measuring the pressure of clean gases, steam and non-crystallizing liquids. The transmitter's sensor is piezoresistive. The rangeability is 100:1 for types VT6–VT7.

TECHNICAL SPECIFICATIONS

Measuring range and span

See Selection Chart.

Zero and Span adjustment

Zero elevation: Calibrated span is freely selectable on the specified range depending from the desired option. This can be made by using the local display option, HART® communicator or Si-Tool.

Damping

Time constant is continuously adjustable 0.01 to 60 s.
